Family Business Established in the Year 1975

The year was 1975 and shower curtain manufacturing was done for the retail trade demand, hotels and motels were up and coming with no established direct provider for quality shower curtains. Kartri was established to do just that, give the hospitality trade its own supplier. Proudly, years continued with success in manufacturing in a small town named Forest City, we grew our family business with loyalty and quality assurance to our distributors.

In the year 1992, we partnered with a manufacturing plant in Mexico, which today produces 90 percent of all our products. We manufacture shower curtains, healthcare curtains, table linen, hair dryer bags, bedding and custom amenities. Shortly after we began importing products from China, Pakistan, India, etc. We direct small to very large programs with all known distributors and brands, we offer support to assure proper forecasting and strong service.

We work hard and we've earned knowledge on how to continue our success for the hospitality and institutional industry.
